

## ELECTRIC AVENUE

**T**he future of transportation is finally here! Eagle Motorcycles, along with their advocacy on environment protection, has started an innovative revolution towards a cleaner and greener tomorrow. Take part on this change towards a better future. Go Green Today!

With an Eagle electric scooter, you can kiss your gasoline station visits goodbye! These electric motorcycles run with 1000 watt electric motors. You can travel anywhere from 40 to 50 kilometers range for every three (3) to four (4) hours recharge time. The actual distance naturally depends on your weight and the terrain you are traversing.

A 1000 watt motorcycle delivers about the equivalent of 50cc motorcycle in terms of power, acceleration and response. You can get all the way up to a hefty 3000 watt motorcycle that rivals the performance of a 150cc motorcycle engine.

The emission of an electric motorcycle is ZERO! Nothing to burn simple means nothing to expel. No mufflers to burn your legs too. It is safe and environment friendly!

A common form of noise pollution is transportation, principally motor vehicles. Noise can affect your health. Noise pollution can cause annoyance and aggression,

hypertension, high stress levels, tinnitus, hearing loss, sleep disturbances and other harmful effects. Noise can also have detrimental effects on animals by causing stress and disturbance on natural animal behavior. But you don't have to worry because electric motorcycles are noise free. All you can hear is the sound of rubber in the road.

We are glad to inform you that certain leaders of progressive communities have started to collaborate with Eagle Motorcycles for the conversion of noisy and smoke belching motorcycles to our new environment friendly electric motor bikes and tricycles. One of the leaders that started to take the first few steps to green reform is Mayor Ed Hagedorn of Puerto Princesa City in Palawan. The world needs more leaders like him who are seriously trying and working on reforms for the environment. Eagle Motorcycles acknowledges the aggressive leadership of Mayor Ed Hagedorn. He is taking his city down Electric Avenue!

Join us now on our pursuit for a cleaner and greener tomorrow. Prices start at 65,000Php for the model that you see here. And go up to 135,000Php for the bigger 3000 watt model. But either way you go, you will be a shining star of environmental concern if you start driving down Electric Avenue.

*20 year guaranteed waterproof saddlebags and waterproof 100watt speakers are accessories you'd like to have.*
